📇 Introduction

I'm an IT student looking for my first experience in a professional environment and an opportunity to start building a career and gather knowledge in the field. I seek to learn and get a thorough understanding of the systems I have to work with, through the help and mentoring of experienced peers or in a self-taught way, this way bringing the most value I can into the environment I develop in.

🧠 Skills

Git
Fundamentals on how version-control systems work and knowledge on the basics of git.

Bash Scripting
Proficient and can develop solutions using the tools provided by the scripting language.

Linux
Fundamentals on Linux system administration and knowldge on operating systems workings and functions.

Java
Proficient in the language, knowledge of it's libraries, IDEs, debugging, and other tooling. My main knowledge in data structures and algorithms stems from programming on Java.

C
Proficient in the language, made a project to manipulate subtitles.

SQL
Understanding of relational databases, designing and modelling, basic querying and normalization.

HTML & CSS
Knowledge in the fundamentals

🌐 Languages

English (*Working Proficiency*) | **Spanish** (*Native*)

Universidad Nacional de La Plata (UNLP) 🔗

2016 – 2021

Currently on last year of a 3-year degree that allows a quick entry to the job industry. The career has orientations that seek to focus on issues of the demand of companies related to IT and ICT, and a supervised Professional Practice done in companies or in R&D&I groups of the Faculty.

🎸 Interests

Blockchain, Cryptocurrencies and Decentralized Web
I have a deep interest and curiosity regarding the way the Internet and it's structure is apparently heading and transforming into the future. I find myself constantly learning about blockchain technologies, cryptocurrencies and decentralized finance, peer-to-peer and distributed architectures.

History and Sciences in general
Love learning about our history as a species, ancient or modern, our planet and even the universe we inhabit. I feel it gives us an invaluable lens to look through the actions we take in the present and the ideas we hold.
